AMENDMENT AFTER FINAL EXPEDITED PROCEDURE ART UNIT 3738 09/737,765

IN THE CLAIMS

- 1.(Currently Amended) A surgical implant comprising:
- a biodegradable material having a helical configuration [wherein said material is] and internally reinforced with biodegradable reinforcing elements in a longitudinal direction of the material [and said implant has a helical configuration].
- 2. (Currently Amended) The surgical implant of claim 1, wherein <u>said biodegradable</u> reinforcing elements are selected from the group consisting of microfibrils and fibrils [internally reinforce the material].
- 3. (Currently Amended) The surgical implant of claim 1, wherein <u>said biodegradable</u> reinforcing elements <u>are</u> selected from the group consisting of fibers, wires, braids, and ribbons [internally reinforce the material].
- 4. (Previously Amended) The surgical implant of claim 1, wherein the implant has a screw-threaded configuration.
- 5. (Currently Amended) The surgical implant of claim 1, further comprising a second biodegradable material having a second helical configuration [wherein said second material is] and internally reinforced with second biodegradable reinforcing elements in a longitudinal direction [and said implant has a second helical configuration] of the second material, wherein the helical configuration and the second helical configuration are at least partially nested within each other.

AMENDMENT AND RESPONSE UNDER 37 C.F.R. §1.116

SIR:

In response to the Office Action of April 2, 2003, Applicants hereby petition for a one-month extension of time extending the period of response up to and including August 2, 2003. Applicants respectfully request entry of the foregoing amendments and request reconsideration of the present application.

DRAFT

AMENDMENT AFTER FINAL EXPEDITED PROCEDURE ART UNIT 3738 09/737,765

REMARKS

Claims 1-5 are pending in the present application. Claims 1, 2, 3, and 5 have been amended. Applicants submit that the present amendments only re-phrase existing elements recited in the claims and raise no new issues, require no additional search, or introduce any new matter. Applicants therefore submit that such amendments are proper at this stage of prosecution and respectfully request entry thereof.

Claims 1, 3, 4, and 5 stand rejected under 35 U.S.C. §102(e) as being allegedly anticipated by U.S. Patent No. 5,019,090 to Pinchuk ("Pinchuk"). Claim 2 stands rejected under 35 U.S.C. §103(a) as being allegedly rendered obvious by Pinchuk in view of U.S. Patent No. 4,937,323 to Silver et al. ("Silver"). Applicants respectfully traverse these rejections.

Claims 1, 3, 4, and 5 Are Not Anticipated by Pinchuk

According to the Office Action, Pinchuk discloses a surgical implant comprising a biodegradable material wherein the material is reinforced in a longitudinal direction and the implant has a helical configuration. To support this assertion, the Office Action cites col. 7, lines 5+ which, according to the Office Action, provides for a stent that may be biodegradable and coated and that such disclosure is interpreted as disclosing an outer coating reinforced with a core of material.

The present claims have been amended to clarify that the biodegradable material is internally reinforced with "biodegradable reinforcing elements." Applicants believe that such a clarifying amendment is unnecessary because the claims always recited that the biodegradable material is internally reinforced and based on a reading of the specification, this means that the biodegradable material is internally reinforced with biodegradable reinforcing elements. (See e.g. page 5, lines 15-19; page 8 line 21 to page 9, line 9; page 9, line 22 to page 10, line 5). Nonetheless, Applicants have explicitly included this element in the claims. Examples of "biodegradable reinforcing elements" can be found on page 8, line 22 to page 9, line 9 of the specification. Accordingly,

Received from < 202 220 4201 > at 7/29/03 3:56:04 PM [Eastern Baylight Time]

DRAFT

AMENDMENT AFTER FINAL EXPEDITED PROCEDURE ART UNIT 3738 09/737,765

Applicant submit that Pinchtuk does not anticipate the present claims as Pinchtuk does not teach or suggest biodegradable reinforcing elements and specifically Pinchtuk does not teach or suggest a biodegradable material that is internally reinforced with biodegradable reinforcing elements in a longitudinal direction of the material. Claims 1, 3, 4, and 5 are therefore not anticipated by Pinchtuk and Applicants respectfully request withdrawal of this rejection.

Claim 2 Is Not Anticipated by Pinchtuk in View of Silver

According to the Office Action, Pinchtuk teaches a stent made from biodegradable materials and Silver teaches fibers made from biodegradable fibrils used for the manufacture of prosthetic devices. The Office Action concludes that to use the degradable material of Silver to make the stent of Pinchtuk would have been obvious.

As mentioned earlier, the present claims specifically recite a biodegradable material reinforced with "biodegradable reinforcing elements" in the "longitudinal direction of the material". Claim 2 specifies that these biodegradable reinforcing elements may be microfibrils or fibrils. Silver, on the other hand, describes a collagen sponge prepared from powder or flakes. If it is the Examiner's position that these powders or flakes equate to "biodegradable reinforcing elements" as that term is used in the present application and as recited in the present claims, Applicants respectfully request clarification. It is Applicant's position that there is no mention at all in Silver of biodegradable reinforcing elements, as this term is described in the specification and recited in the present claims. Moreover, there is no mention at all in Silver of biodegradable reinforcing elements that reinforce the biodegradable material in the longitudinal direction of the material, as recited by the present claims. Therefore, Silver does not make up for the deficiencies of Pinchtuk and therefore claim 2 is not rendered obvious by Pinchtuk in view of Silver. Accordingly, Applicants request withdrawal of this rejection.

DRAFT

AMENDMENT AFTER FINAL EXPEDITED PROCEDURE ART UNIT 3738 09/737,765

Respectfully submitted,

CONCLUSION

It is respectfully submitted that the present application is now in condition for allowance, which action is respectfully requested. The Examiner is invited to contact Applicants' representative to discuss any issue that would expedite allowance of the subject application.

It is not believed that any extensions of time or other fees are required in connection with the filing of this response. However, if any fees for extension(s) of time or additional fees are required in connection with the filing of this response, such extensions of time are hereby petitioned under 37 C.F.R. § 1.136(a), and the Commissioner is authorized to charge any such required fees or to credit any overpayment to Kenyon & Kenyon's Deposit Account No. 11-0600.
